Xuan PENG

Data Analyst / Data Engineer
Paris, France | xuan.peng@outlook.fr

PROFILE

Data Engineer / AI with 10+ years of experience in banking and energy, specialised in building and hardening production data workflows. On BNP Paribas Dataiku platform, I ensure the quality, reproducibility and traceability of pipelines: data quality checks, non-regression testing, and management of execution environments and access rights. I cover the full data & AI lifecycle: distributed pipelines (Spark, Delta Lake, Databricks), Machine Learning and Deep Learning models (classification, NLP, LLMs, graphs) and rigorous validation (walk-forward, data-leakage prevention, metrics suited to imbalanced classes). Executive Master in AI & Data Science, Université Paris Dauphine-PSL. Python, SQL, PySpark.

Data competitions:

→ SNCF / ENS Challenge 2025 – Ranked in the top 8% of 665 teams with a waiting-time prediction model that saves several minutes per train.

SKILLS

Machine Learning: Machine Learning, Deep Learning, NLP, LLMs, classification, regression, scikit-learn, PyTorch, Hugging Face

Deep Learning & NLP: PyTorch, Transformers, fine-tuning, weak labelling

Model validation & evaluation: backtesting, walk-forward validation, bias correction (survivorship), error analysis, metrics (AUC, F1, Sharpe, modularity)

Data governance & quality: quality control, anomaly detection, validation, non-regression testing, traceability, access and permission governance, incident recovery

Platforms & productionisation: Dataiku DSS, Databricks, Delta Lake, Docker, Git, Linux, reproducible pipelines, idempotency

Programming: Python, SQL, PySpark, basic Scala

BI & reporting: Power BI

Databases & methods: SQL Server, PostgreSQL · Agile, JIRA, Confluence, ServiceNow

Languages: French (fluent), English (TOEIC 930)

PROFESSIONAL EXPERIENCE

Data Engineer

BNP Paribas via CGI · Île-de-France, France · 12/2023 – Present

- Own data quality and reliability in production on the Dataiku platform: quality checks, non-regression and service-continuity testing during production releases.
- Govern access and permissions: management of user and group rights, and of certificates across all instances.
- Ensure traceability and reproducibility of workflows: governance and migration of Dataiku code environments to the new version.
- Administer integration with reporting tools (Power BI, Tableau) and develop a usage-tracking use case (user tracking).
- Formalise standards and procedures (Confluence documentation) and provide level-3 support (ServiceNow, JIRA).

Stack: Python, Dataiku DSS, PostgreSQL, Git, Linux, Power BI, Tableau, ServiceNow, JIRA, Confluence

Data Analyst

EDF via CGI · Île-de-France, France · 04/2019 – 10/2023

- Performed technical and functional SQL analyses to detect and resolve data anomalies.
- Developed technical solutions and ran integration testing on the FELIX billing project.
- Drove continuous improvement of applications and managed CRM data flows.

Stack: SQL, Salesforce, CC&B software package, JIRA, Confluence

Business Intelligence Consultant (EPM)

Société Générale · Crédit Agricole · JCDecaux via Jems · 03/2012 – 12/2016

- Maintained and migrated Hyperion Planning / Essbase applications (migration v11.1.1.3 → v11.1.2.3).
- Designed HR simulation cubes and rebuilt an HR application from Essbase to Planning (impact analysis, scripts, data load rules).
- Optimised Essbase scripts and trained users.

Stack: Hyperion Planning, Essbase, SQL, management control, budgeting and forecasting

EDUCATION & CERTIFICATIONS

Executive Master — Artificial Intelligence & Data Science
Université Paris Dauphine-PSL — 2026

Master's — Financial Engineering
IAE Tours — 2011

Bachelor's MIASS (Applied Mathematics and Computer Science for Social Sciences)
Université Grenoble — 2009

Certifications: Dataiku (Core / Advanced Designer / Developer / ML Practitioner), Microsoft PL-300, PCAP (Python), Machine Learning Specialization (Coursera).
